EDUCATION

Chandigarh University

B.E. – Computer Science Engineering | CGPA: 7.91

- Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Web Development

Chandigarh, India

Aug. 2024 – Jul. 2028

APS Hisar Cantt

Class XII – PCM + CS | 82.2%

Hisar, Haryana

Mar. 2024

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), Python, C++, TypeScript

Frameworks & Libraries: Spring Boot, React.js, Next.js 14, Node.js, Express.js, FastAPI, Flask

Databases: MongoDB Atlas, PostgreSQL (Supabase), SQLite

Tools & Platforms: Git, GitHub, Mapbox GL JS, OpenCV, Scikit-learn, Pandas, Postman

Core Competencies: DSA, System Design, OOP, REST API Design, Agile Development

PROJECTS

SafeRoute AI | Next.js 14 · FastAPI · Node.js · Supabase · Mapbox GL JS

[GitHub](#)

- Built a full-stack urban safety platform delivering real-time AI safety scores (0–100) via a 4-component engine: sector baseline, POI density, news sentiment, and crowd-sourced reports.
- Architected microservices backend with Node.js/Express API gateway + FastAPI/Python AI service for modular, independently deployable scoring layers.
- Integrated Overpass API (OSM) for live POI fetching and NewsAPI + OpenAI for news sentiment scoring with automatic keyword-based fallback ensuring zero-downtime.
- Designed Supabase (PostgreSQL) crowd-sourcing system applying dynamic ± 15 pt community adjustments; delivered Mapbox dashboard with heatmap, leaderboard, and Twilio SMS alerts.

Resource & Skill Management System | Java · Spring Boot · MongoDB Atlas · React.js

[GitHub](#)

- Engineered a full-stack platform managing 100+ employee profiles with automated skill-based ranking across 5+ departments and real-time analytics dashboard.
- Architected 3-layer Spring Boot backend (Controller → Service → Repository), reducing code coupling by 40%; exposed 15+ REST endpoints with Jakarta Bean Validation achieving 100% invalid-request rejection.
- Built weighted skill scoring engine across 10+ categories and integrated MongoDB Atlas embedded schema, eliminating JOIN operations for faster query response.

Flight Delay Prediction System | Python · Scikit-learn · Pandas · Matplotlib

[GitHub](#)

- Trained a Random Forest Classifier on 10,000+ records achieving 85%+ accuracy, engineering 8+ features from weather and schedule data with full preprocessing pipeline.
- Generated confusion matrix heatmaps and feature importance plots to communicate model insights to non-technical stakeholders.

ACHIEVEMENTS

Sports

- Runner-Up – Inter-Hostel Basketball League: Led team to 2nd place finish in the hostel basketball championship across competitive rounds.
- Participant – Inter-Departmental Basketball Championship: Represented department across multiple competitive seasons.

Academic & Competitive Programming

- Participant – Code Crafter 3.0 Hackathon: Gained hands-on experience in team-based rapid prototyping and real-world problem solving under time pressure.
- Finalist – Aptivista Aptitude Competition: Ranked in the top finalists university-wide in analytical reasoning and quantitative problem-solving.
- Finalist – Mystery Code Competition: Solved complex algorithmic challenges under strict time constraints.

- Participant – AI Fest 2026, Chandigarh University: Engaged with cutting-edge AI and ML research and innovations.

Leadership

- Event Volunteer – Multiple University Events: Coordinated logistics for large-scale events demonstrating initiative and cross-functional collaboration.
